

TAG3

Bottom Line Medtech™

Product design, development, and
manufacturing solutions for medtech
organizations of all sizes

Fast, Simple, Transparent

Best-in-class services with unparalleled speed and agility

Your partner for all things medical device development and manufacturing.

TAG3 offers a wide range of services, including contract design and development, prototyping, IP development, manufacturing process development, regulatory submissions, and quality remediation. Catering to startups, large medical device companies, and healthcare professionals, TAG3 offers clients an à la carte option allowing them to choose specific services depending on their requirements.

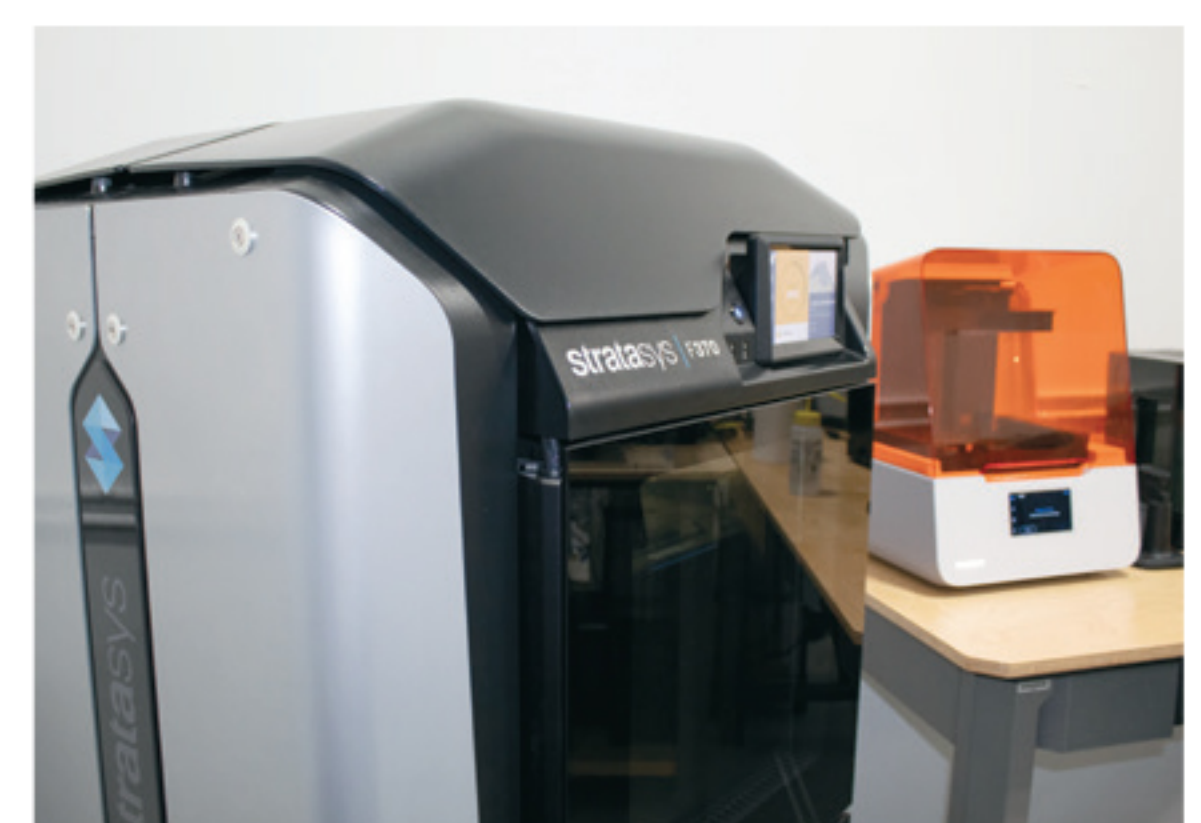

With a multidisciplinary team of experts, TAG3 takes ideas from concept all the way through a limited market launch and focuses on everything in between.
